DETAILED ACTION

Response to Amendment

1. Applicant has amended claims 1, 12, 19 and 25. Claims 32-34 have been added. Claims 32-34 have been canceled. Claims 1-31 are currently pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan Tanner (Reg # 54734) on 08/31/2006.

The application has been amended as follows:

Claims 32-34 have been canceled.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Jamali et al.(U.S. Patent Number 6,269,188) being the most pertinent piece of prior art teaches a method of determining at least one OCR-output character attribute for each of the OCR-output characters in the OCR-output text passage as well as determining an error rate for the OCR-output text passage using a "triage" model and the determined OCR-output character attributes and then comparing. What Jamali doesn't disclose is the text passage having "text segments" and determining an error rate for the OCR-output text passage as a whole. Further searching on these added limitations has yielded no viable pieces of prior art, which could be used to teach these added limitations. On that basis the Examiner finds this application to be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
